

# SEARCH, ZOOM, AND PRINT CAPABILITIES

Find address or place

The search option allows the user to search for a location such as a city, state, zip code, or general place name.

The scroll wheel on the mouse can be used to zoom, and in the upper left area of the tool are “+” and “-” icons to zoom in and out, respectively.

These icons zoom to the previous or next extent of the map.

or to the full extent of the map.

Print Map

The print map tab creates a .pdf file of the current map extent, including an explanation.

Clicking on an arrow or circle (plotted at the center of the well network) will display well locations, bring up a table with details about the network - see example below.

With the network or principal aquifer boundaries displayed, click on shaded areas of the map to display details of the network or the name of the selected principal aquifer.

Nitrate (measured as nitrite plus nitrate)	no change
Network type	Urban land use network
Types of wells	Monitoring wells
Typical depth range	32 to 51.25 feet
Principal aquifer	Puget Sound aquifer system
Regional aquifer	Not applicable
Aquifer material	Unconsolidated sand and gravel
Additional information	residential
NAWQA network code	pugtlusrs1
Sample dates (1 <sup>st</sup> , 2 <sup>nd</sup> )	1996, 2005

Reposition the popup with the mouse to display networks if necessary.

[ZOOM TO NETWORK](#)

[For explanation of table entries click here](#)

The user has an option to zoom to the geographic extent of a network.

Additional details about the items on the table are available.
